Subject: Extension of Regular Affiliation up to Senior Secondary Level : Compliance of Infrastructure Facilities

Sir/ Madam,

Reference is made to affiliation grant letter no: CBSE/3520181/Ex-02502-2627/2026-27 dated 10/06/2025. This school was granted regular extension for the period 01.04.2026 to 31.03.2031 with some infrastructure compliance related deficiencies noticed during regular extension of school. As per the letter reference number cited above under para 6, following points are submitted for your kind consideration:

- (i) The school is an Uttarakhand Government run organization and budgetary allocation to the school for its infrastructure requirement is provided by the State Government for smooth functioning of the school. The school has an existing boundary wall around its periphery but the height of the wall is below 6' (six feet). Budget demand as well as its approval has been obtained by the school from the appropriate sanctioning authority. (Approval letter of the sanctioning authority and school , attached for ready reference) The assigned work of the wall could not start due bad weather (rainy season). Work is expected to start soon.
- (ii) The school is situated in geographically difficult terrain and vehicular access to the school is not available. School is also not designated as CWSN friendly school so the facilities for CWSN student are currently not available in the school. School has apprised the authority about the same.
- (iii) The school has Composite Science Lab and Computer Lab and efforts are being made by the School as well as the government to equip the labs with proper infrastructure. Demand for the items has been raised by the school. (Letter attached)

- (iv) Current strength of the school is 51 students and the area served by the school has limited population. The student strength is likely to remain in the range of 50 to 60 students each year. School has two smart T.V.s and other deficient facilities related to ICT infrastructure will also be made available as and when the budget is made available to the school.
- (v) School has indoor and outdoor sports facilities and a big play ground (area 3825 sq mt approx.) with facilities for different games. Facility for other games for students will also be made available.
- (vi) Digital infrastructure of school is also centrally developed by the Uttarakhand Secondary school department under the guidance of the state department. The request for development of digital infrastructure of the school has been forwarded to the appropriate authority.

Keeping in view the limitations of the school in developing the infrastructure facility as stipulated in the Affiliation Bye Laws, it is requested to cancel the penalty imposed on the school.
